tesla pulse.

features

Power supply
90-240 Vac / 50-60 Hz
Electrical input power
120 VA

features pulse mode

Output frequency
0,5 – 5 Hz
Max output level
10 kGauss(1T)

what's news

- High luminosity touchscreen display
- Intuitive icons interface
- Controls of the unit made by one knob
- Multipurpose encoder, keys or touchscreen
- Stored protocols inside
- Customized programs
- Possibility to upgrade through USB port
- Six languages software

tesla pulse.

tesla pulse is a device designed for professional applications for the treatment of oste-articular pathologies.

tesla pulse can command a pair of flat transducers (optional) and a new handle of pulsed magnetic field. Outputs can be activated individually.

tesla pulse in PULSE mode through the interchangeable circular head of the handpiece emits a pulsed magnetic field characterized by: Low frequency, negligible electric field, high magnetic pulsed field (1 Tesla) (RAdiated Magnetic Pulse RAMP), negligible thermal effects, high penetration in tissues, this particular field results in non-invasive and non-painful applications, favoring draining and cellular normalization through tissue and cell biostimulation for the treatment important traumatic pathologies with or without edema, inflammatory and / or painful forms such as cervical arthrosis, lumbagoe, scapolomeric periarthritis, sciatica, tendinitis, sports trauma (stretching, tearing, etc.)

tesla pulse has a touchscreen graphic display that allows interactive control of the unit.
